EXPERIENCE

Stealth Hedgefund | Senior Software Engineer Helena, MT | Feb 2024 - Present

- Primary engineer architecting and building the company's website from the ground up, owning features end to end in a fast-moving, stealth-stage startup environment.
- Developed backend services in C# on .NET with Aspire, deployed through Microsoft Azure for cloud infrastructure, hosting, and monitoring.
- Built a responsive React frontend integrated with .NET backend services to deliver a polished user experience.

SoFi | Senior Software Engineer (Full Stack) Helena, MT | Jun 2018 - Jan 2024

Student Loans Team

- Team Lead for the transition from a monolithic application to a modern microservice architecture.
- Partnered closely with design and front-end teams, defining contracts between the front end and back end to specify exactly how every page would look and behave rather than relying on a single generic form.

Personal Loans Team

- Implemented new Personal Loans features in partnership with Product and Design.
- Integrated the Ingo API to automate payments to credit card companies for personal loan debt.
- Rebuilt transactional emails in Braze, driven by Kafka producers and consumers; monitored and created alerts for time-sensitive and legally required emails.

Originations Core Team

- Modernized Operations tools with microservices, streamlining loan approval processes.
- Collaborated with Operations leads to identify and address application shortcomings.

SoFi | Software Engineer (Full Stack) Helena, MT | Jun 2015 - Jun 2018

Operations Team

- Ensured reliability of applications through full-stack development and support.
- Built and maintained Operations tools on a Scala, Play Framework, and Java monolith.

PROJECTS

- **Whose News (whosenews.org):** Public site that traces who owns a news outlet, step by step, with a source for every step, across 25,000+ outlets. Cloudflare Workers, D1, Workers AI embeddings, scheduled ingestion jobs.
- **TopoDot watch face:** Garmin Connect IQ watch face in Monkey C with a custom LED dot-matrix renderer over topographic maps built from USGS elevation data with GDAL; 30+ configurable metrics.
- **letmespam (github.com/TeeHutchens/letmespam):** Open-source Claude Code plugin that batches multi-line input into one message, with optional condensing by a smaller LLM.
- **Homelab:** Raspberry Pi and Mac Mini running Docker services, Discord bots, home automation, and local LLMs (Ollama) with a shared MCP memory server.

TECHNOLOGIES

- **Languages and Frameworks:** Java, Kotlin, JavaScript, TypeScript, Python, C#, .NET with Aspire, React, Next.js, Spring Boot, Dropwizard, Play Framework, Monkey C.
- **Data and Infrastructure:** Postgres, Kafka, gRPC, Redis, REST, SQL, Gradle.
- **Cloud and DevOps:** Microsoft Azure, Cloudflare Workers and D1, Docker, Kubernetes, GitLab CI/CD, Git.
- **Tools:** Atlassian Suite, Datadog, Amplitude, Braze, Figma, JetBrains, Claude Code.

EDUCATION

Carroll College | Bachelor of Arts in Software Engineering Helena, MT | 2015
